FAQs

| General | Hardware | Software |

[GQ1]How long does it take to generate one template?

[GQ2]What is a template?

[GQ3]Does wearing glasses or contact lenses prevent iris identification?

[GQ4]Are iris biometrics affected by Lasik eye correction (or any other corrective surgery) or by disease?

[GQ5]What is Distance in iris recognition?

[GQ6]Can iris images be saved on my own computer?

[GQ7]What products can integrate into an existing biometrics system using fingerprint or facial recognition?

IriTech offers iris recognition hardware (cameras) and software (SDK) for each customer's custom-development. As each of our customers has different business needs, we generally offer our products as development toolkits that will ultimately require end-user systems integration. If you need a ready-to-be-integrated platform, we can connect you to one of our systems integration partners for development.
